	Please follow this measuring method:
The following metho	od is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.
Seat width (SW):	
a) For the user:	Allow space between sideguard and hip on each side of the chair
	(approx. 10 - 20 mm altogether)
b) On the wheelchair:	From outside frame tube to outside frame tube.
Seat depth (SD):	
a) For the user:	When sitting upright: leave space for 2 - 3 fingers between
	front edge of the seat upholstery and back of knee
	(approx. 30 - 60 mm). Care must be taken with adj. upholstery.
b) On the wheelchair:	From back tube to front of seat upholstery.
Front seat height:	
a) For the user:	When sitting with 90° kneeangle:
	From back of knee to bottom of shoe sole.
b) On the wheelchair:	From front of seat tube to the ground .
	(min. 30 mm longer than user measurement)
	Remember to include the cushion height.
Rear seat height:	
b) On the wheelchair:	From back of seat tube to the ground.
	Note: Max. seat height difference rear to front is 130 mm
Back height:	
a) For the user:	From the seat, including cushion, to be no more than 10 - 20 mm below the lower shoulder blade.
b) On the wheelchair:	From back of seat tube to upper edge of backrest upholstery.
	Note: The user's adility to sit upright has a major influence on the back height
	and it can therefore differ considerably
Back angle:	Important: The back height depends on the degree of disability.
	0° is the angle 90° to the seat. Negative angles are <90°
	and positive angles are >90°.

## Low Seat Frame vs. High Seat Frame:

The high frame is 40 mm higher than the low frame. So you can choose shorter and lighter forks to minimize the weight of your wheelchair.

#### **Technical Data Overview:**

Max. overall height: Max. overall length:	950 mm 930 mm	Max. overall width:	<b>camber</b> For 0° camber:	<b>24" rear wheel</b> SW + 170 mm	25" rear wheel SW + 170 mm
Max. turning circle:	700 mm		For 2°camber:	SW + 210 mm	SW + 220 mm
Max. safe slope:	7°		For 4° camber:	SW + 260 mm	SW + 270 mm
Wheelchair weight:	from 8,3 kg				
Dismantled weight:	from 5,8 kg				
Weight of heaviest part:	2,1 kg				
All changes in the configurat	on might change	the seat heights.			
Manufacturing tolerances are	e +/- 10 mm for a	I measurements.			© Sunrise Medical 2021 & 22

# SIDEGUARD & ARMREST

KRF040101 Slim style sideguard

KRF040107 Sideguard, composite, removable

(black)

KRF040104 Carbon fibre, cold weather protection, fender

KRF040117 Tubular armrest, swing away, removable, padded KRF040052 Single-post sideguard, armpad (33 cm)

## FRAME VERSIONS: CASTOR HOUSE POSITIONS

72

Further to the front and wider position of the casters for optimized rolling resistance and improved front-stability

#### Position narrow:

22 mm further rearwards and 24 mm per side more narrow position of the casters for a more narrow front-end and improved manoeuverability in tight spaces. Reduced front-stability compared to position wide, we recommend this option in combination with seat- height differences (front to rear) of 40mm or

Castor house position wide vs. narrow
